## SHUTTLE BUS STUDY

Cristiane Mecca Giacomazzi

Mikanto Nomena Rakotomanana

Samrat Patni

Zekeri Yahaya

### ABOUT

A study to assess the Seneca College’s Shuttle Bus service from users perspective and understand the important KPIs.

### MOTIVE

To explore

- 1. Patterns of use
- 2. Users & Non-users Characteristics
- 3. Satisfaction Level

### METHODOLOGY

#### The Survey

18 Questions

24 Respondents

#### Tests/Analysis

Measure of Central Tendencies: Mean, Median  
Mode

Sentiment Analysis: Text Mining/Analysis

# TOOLS USED

## Data Collection

Google Forms

## Data Analysis & Visualization

Tableau 2024

MS SQL Server 19

MS Excel 16

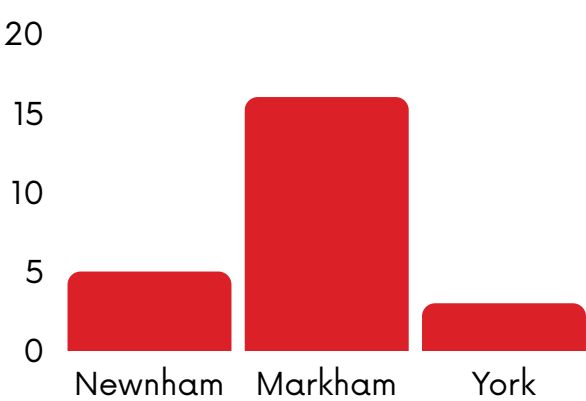

Python  
Programming

# FINDINGS

## OVERVIEW

### General Description of all 24 Participants.

#### Main Campus

Those who use,  
those who did  
not & those who  
stopped.

# THOSE WHO USED

## Characteristics of the Participants who used the service

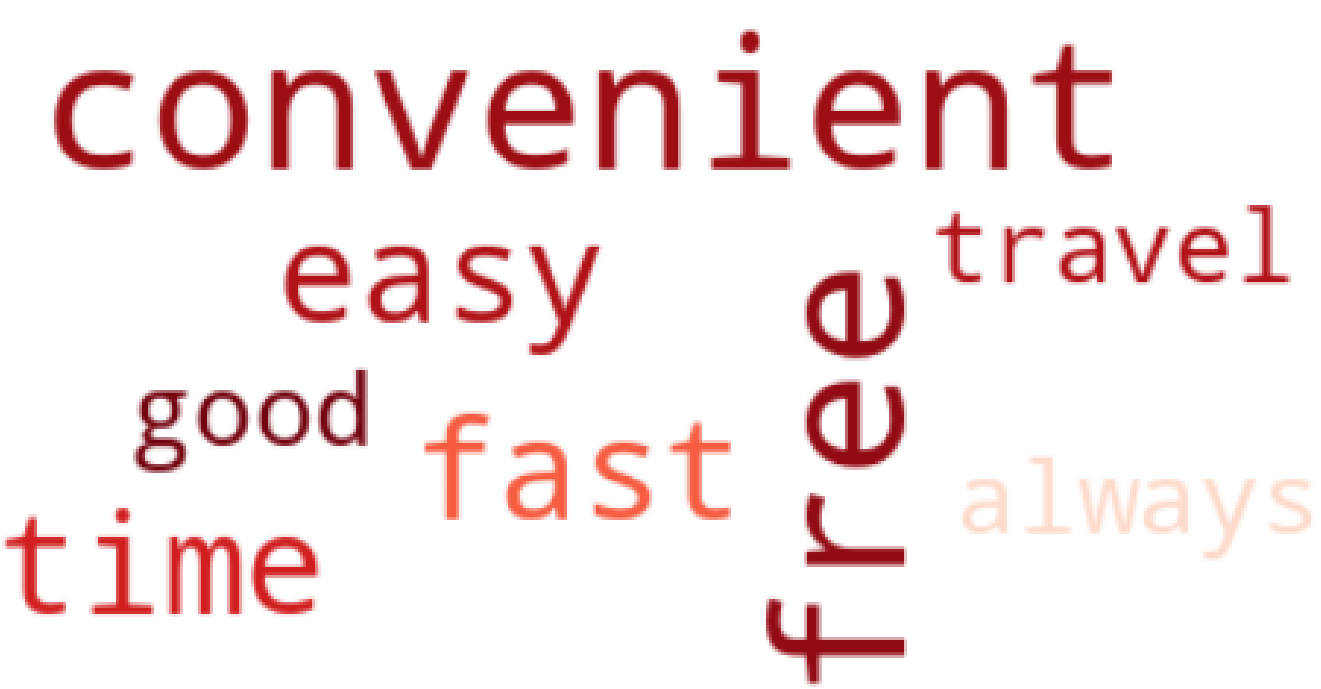

# THOSE WHO DID NOT USE

## Characteristics of the Participants who did not use the service

REVIEW ANALYSIS

SATISFACTION

Overall Satisfaction: 3/5\*

Campus

Newnham		4/5
Markham		3/5
York		3/5

\*Also for satisfaction by gender & age

## LIMITATIONS

- **Small Sample Size:** 24 participants.
- **Majority** of participants identified as **Female(63%)** & were from **Markham campus** (15 out of 24).
- **Self Reported** data.
- **Missing Data** points.

## RECOMMENDATION

- **More data** required for a **realistic understanding** of the service use.
- **Convenience** was the main factor determining the use of shuttle bus service (**based on our data**); hence the service providers/managers should focus on making/keeping the buses user friendly.

## CONCLUSION

The study was conducted with the **aim to investigate the factors linked to the use/non-use** of the shuttle bus & **satisfaction level** of the users with the shuttle bus service.

We found **noteworthy patterns/ratings etc.** in **service use** in relation with the **users' main campus, age, residence area etc.**

However, the data & analysis based on the survey is **very limited** and should be **restricted** only to the observations in this study.

**'Convenience'** was the topmost factor that led the use of service as reported by the participants.

**Recommendation** for the collection of more relevant data and inquiry into the factors that lead to **'Convenience'** in relation with the service use.
