Message from leadership

The past several years have been characterized by geopolitical and economic complexity, a shifting regulatory landscape, and the rapid adoption of innovative technology, all contributing to an accelerated pace of change. While it can seem like every conversation today is about technology, it's our Deloitte people—half a million of us around the world—who bring the technology to life by delivering unique insights, creative problem solving, and breakthrough solutions to help clients navigate this complex environment and support sustainable growth.

Deloitte works with public and private organizations and nonprofits to take on the challenges facing business and society, drawing on our talented people and the depth and strength of our multidisciplinary model. Working together, we are helping to achieve progress around the world.

Advancing sustainable growth and AI-driven transformations

AI marks a historic shift that is reshaping markets, industries, and how we work and live. While AI is incredibly powerful, we believe people must be central to this transformation; AI's true value lies in the ability of the professionals who work with it to create positive impact.

Guided by our Shared Values and our culture built on the highest levels of trust, quality, and integrity, Deloitte is helping shape a people-led, AI-powered future. We are bringing our human skills together with AI to support Deloitte clients' aspirations, creating pioneering solutions, helping to uphold trust and confidence in capital markets, and delivering increased value and insights through the multidisciplinary services we provide. With our Agentic AI platform, Zora AI™ by Deloitte, and our global GenAI incubator network, we are helping organizations refine and scale trusted GenAI solutions.

At the same time, we are using AI tools to transform the way Deloitte serves clients, redesigning our operations and enhancing our people's experience of work. We are committed to responsible AI adoption and utilize Deloitte's Trustworthy AI™ framework to drive transparency and accountability.

In addition, we are helping organizations accelerate toward their sustainability goals, build resilience, and transition to a low-carbon future, as we progress toward Deloitte's net-zero by 2040 goal. Foundational to this is Deloitte's commitment to put our Purpose—to make an impact that matters—at the core of all that we do.

Reporting on our impact

We report on our organization's impact each year to enable stakeholders to evaluate our progress. Throughout this report, we highlight examples of the difference Deloitte professionals make each day through the high-quality services they provide.

Our growth trajectory is powered by the trust and confidence of Deloitte clients—and we are dedicated to earning that trust each day. We are proud of our continuing recognition as a leader across capabilities, industries, and regions, and as the world's most valuable and strongest commercial services brand.

As we work with a broad range of stakeholders to move business and society forward, we continue to build on Deloitte's 180-year history of serving the world's leading organizations with professional excellence. Together, we are advancing toward a bright future.

Joe Ucuzoglu
Deloitte Global CEO

Anna Marks
Deloitte Global Chair

Data highlights

Environment

Science-based net-zero targets:

The SBTi[3] has validated Deloitte's net-zero by 2040 target

Progress toward near-term science-based targets[4]

85% reduction of scope 1 and 2 emissions

Goal of 70% by 2030[5]

61% reduction of scope 3 business travel emissions per full-time equivalent (FTE)

Goal of 55% by 2030[5]

Progress toward other environmental sustainability goals and initiatives[6]

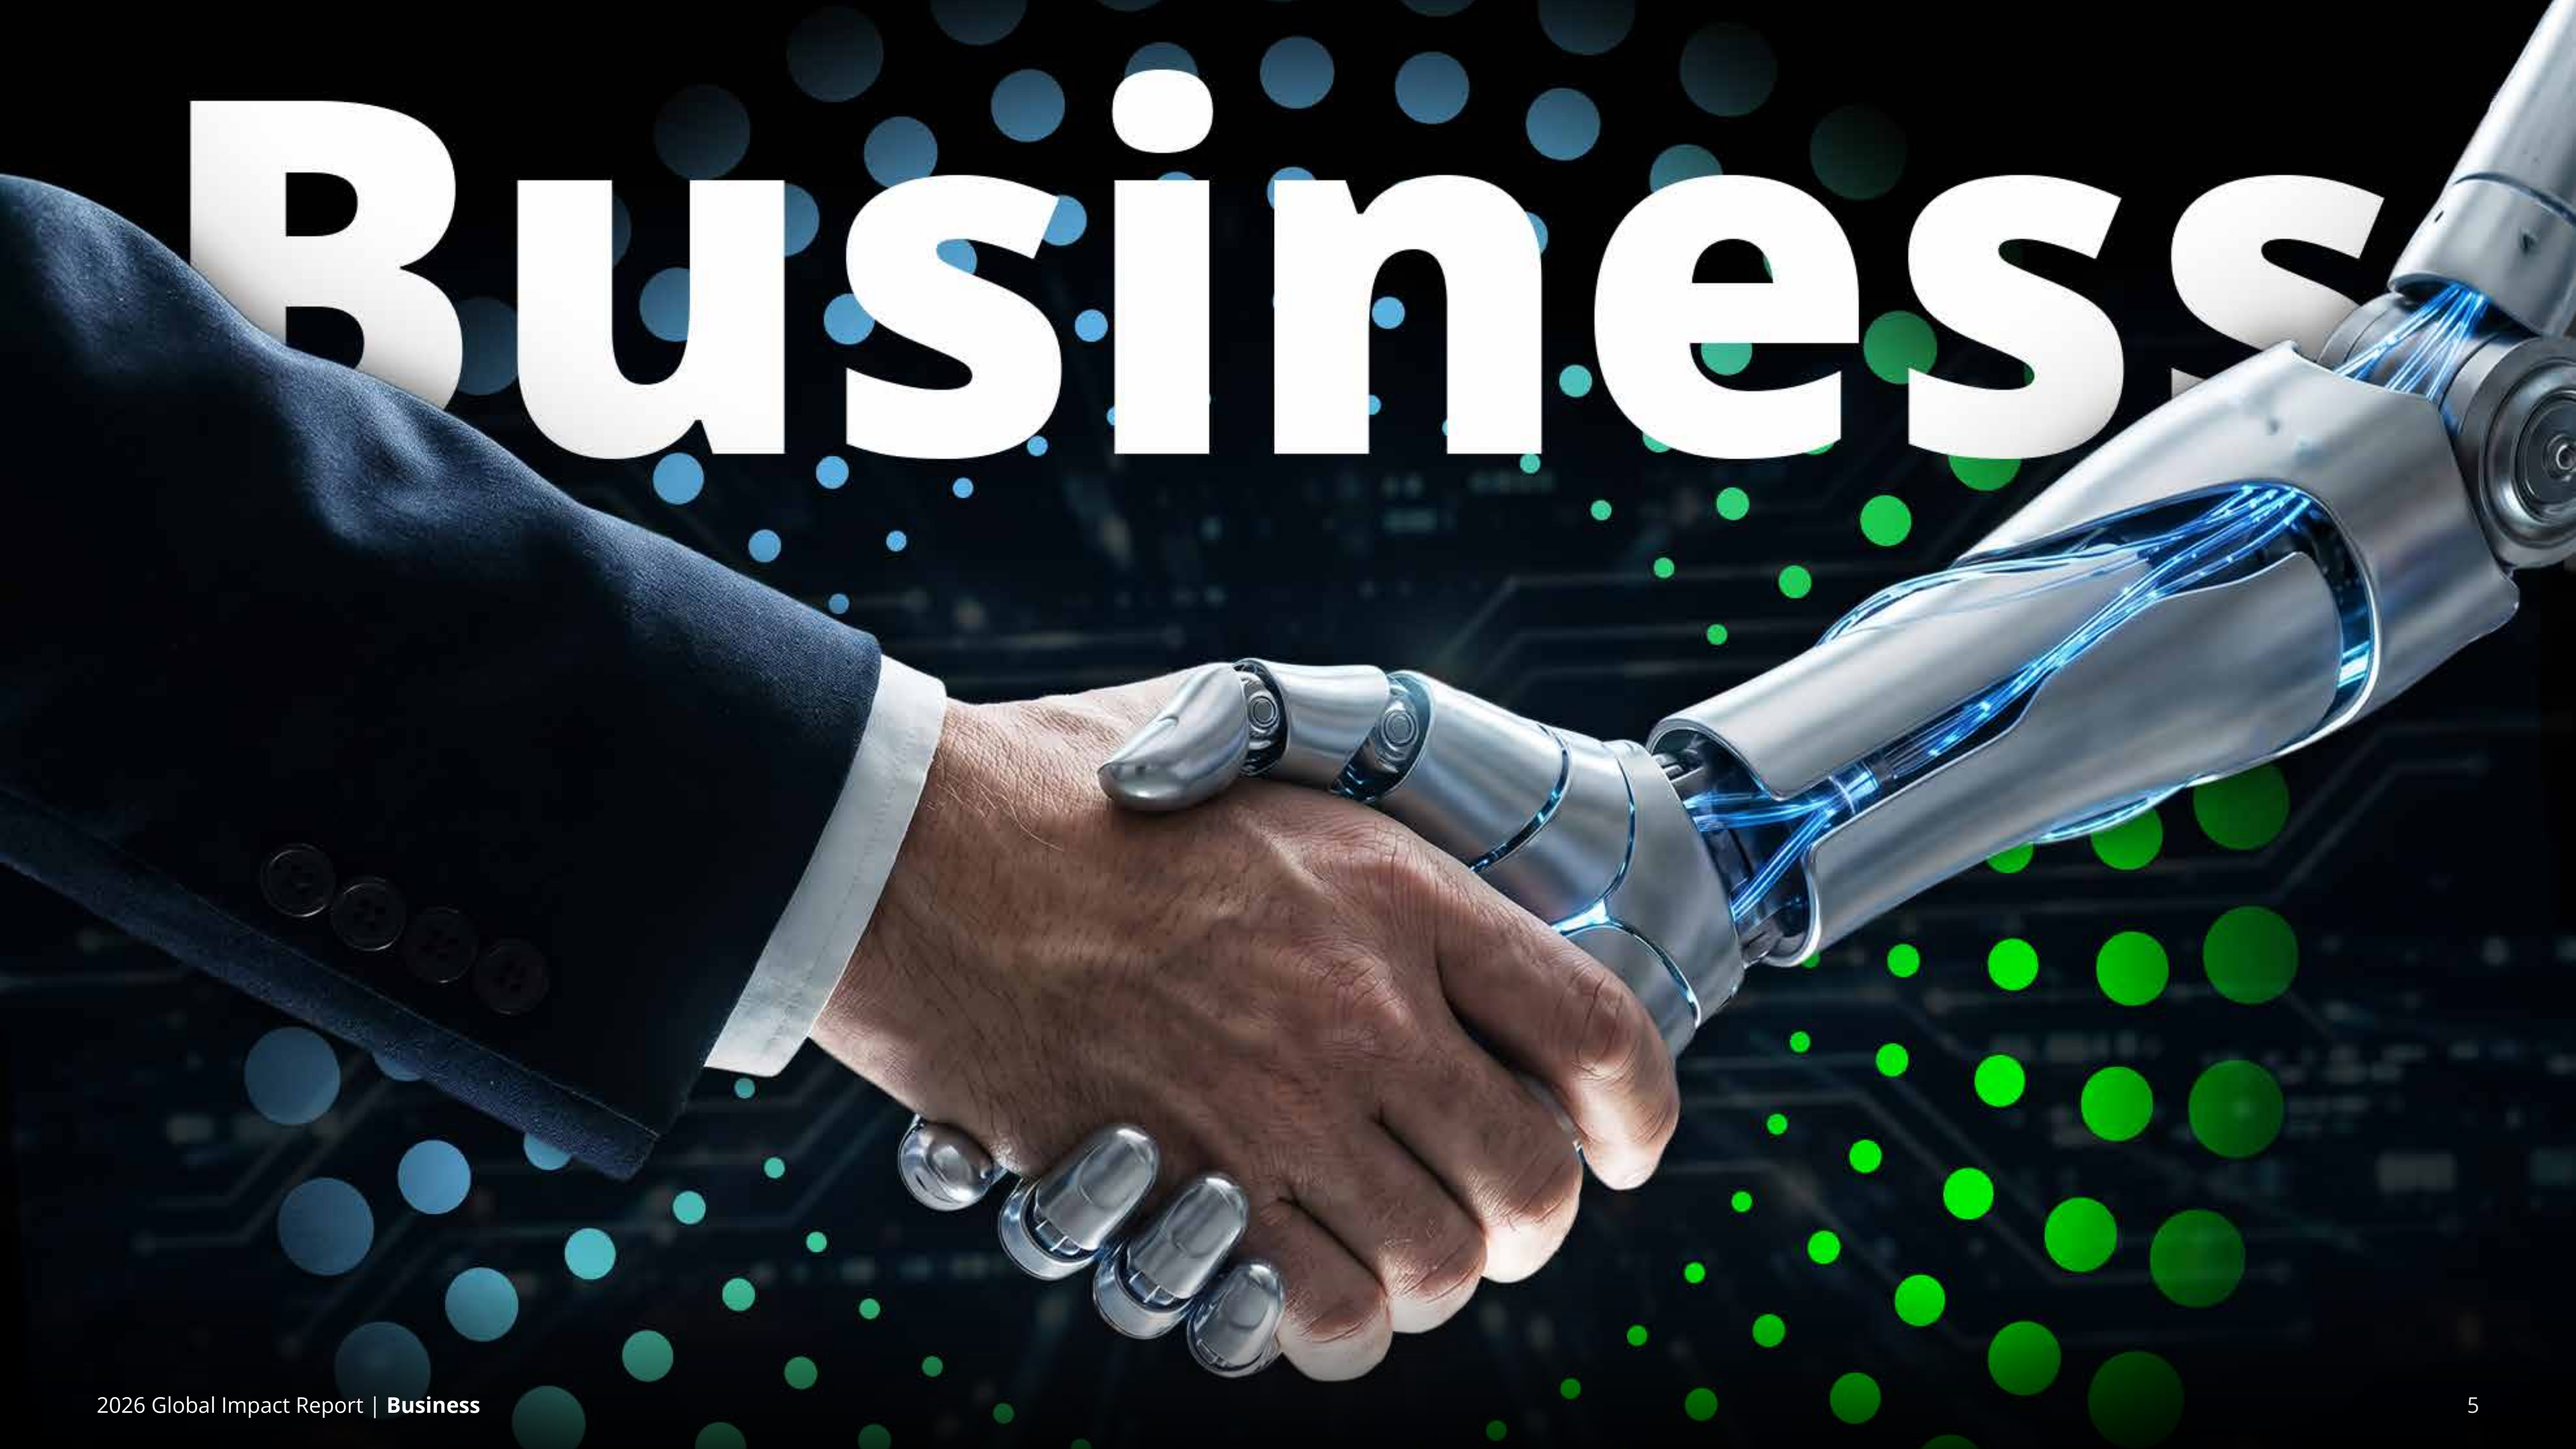

97% renewable electricity purchased (goal of 100% by 2030)

78% of fleet comprised of electric and hybrid electric vehicles (goal of 100% by 2030)

21,902 tonnes of Sustainable Aviation Fuel certificates (SAFc) purchased

Note: Monetary values are presented in US$ and used as the basis for revenue growth percentages, unless otherwise specified.

Business

Business

Deloitte helps organizations navigate today's most challenging issues—from market complexities to geopolitical uncertainty to technological advancements.

Our global reach, multidisciplinary model, deep domain knowledge, distinctive Deloitte culture, and commitment to upholding quality and trust in capital markets allow us to provide integrated solutions that help organizations transform the ways they do business, create enduring value, and shape a better future.

Powering transformation with AI and advanced technologies

The rapid expansion of AI and other transformative technologies is already reshaping industries, creating new markets, and redefining how organizations operate. As these shifts accelerate, organizations are increasingly focused on translating innovation into measurable enterprise outcomes, whether through improved operational efficiency, enhanced customer experience, or advancements to business models.

Deloitte is investing deeply in our people, platforms, ecosystems, and business models globally, including a US$3 billion investment through 2030 to modernize delivery and operations across all our businesses and bring new products and services to market that enable end-to-end transformation. Anchored in Deloitte's Trustworthy AI™ framework, this people-led, AI-powered approach supports the responsible use of AI while helping organizations accelerate entry into new markets, navigate new and evolving constraints, and transform core operations.

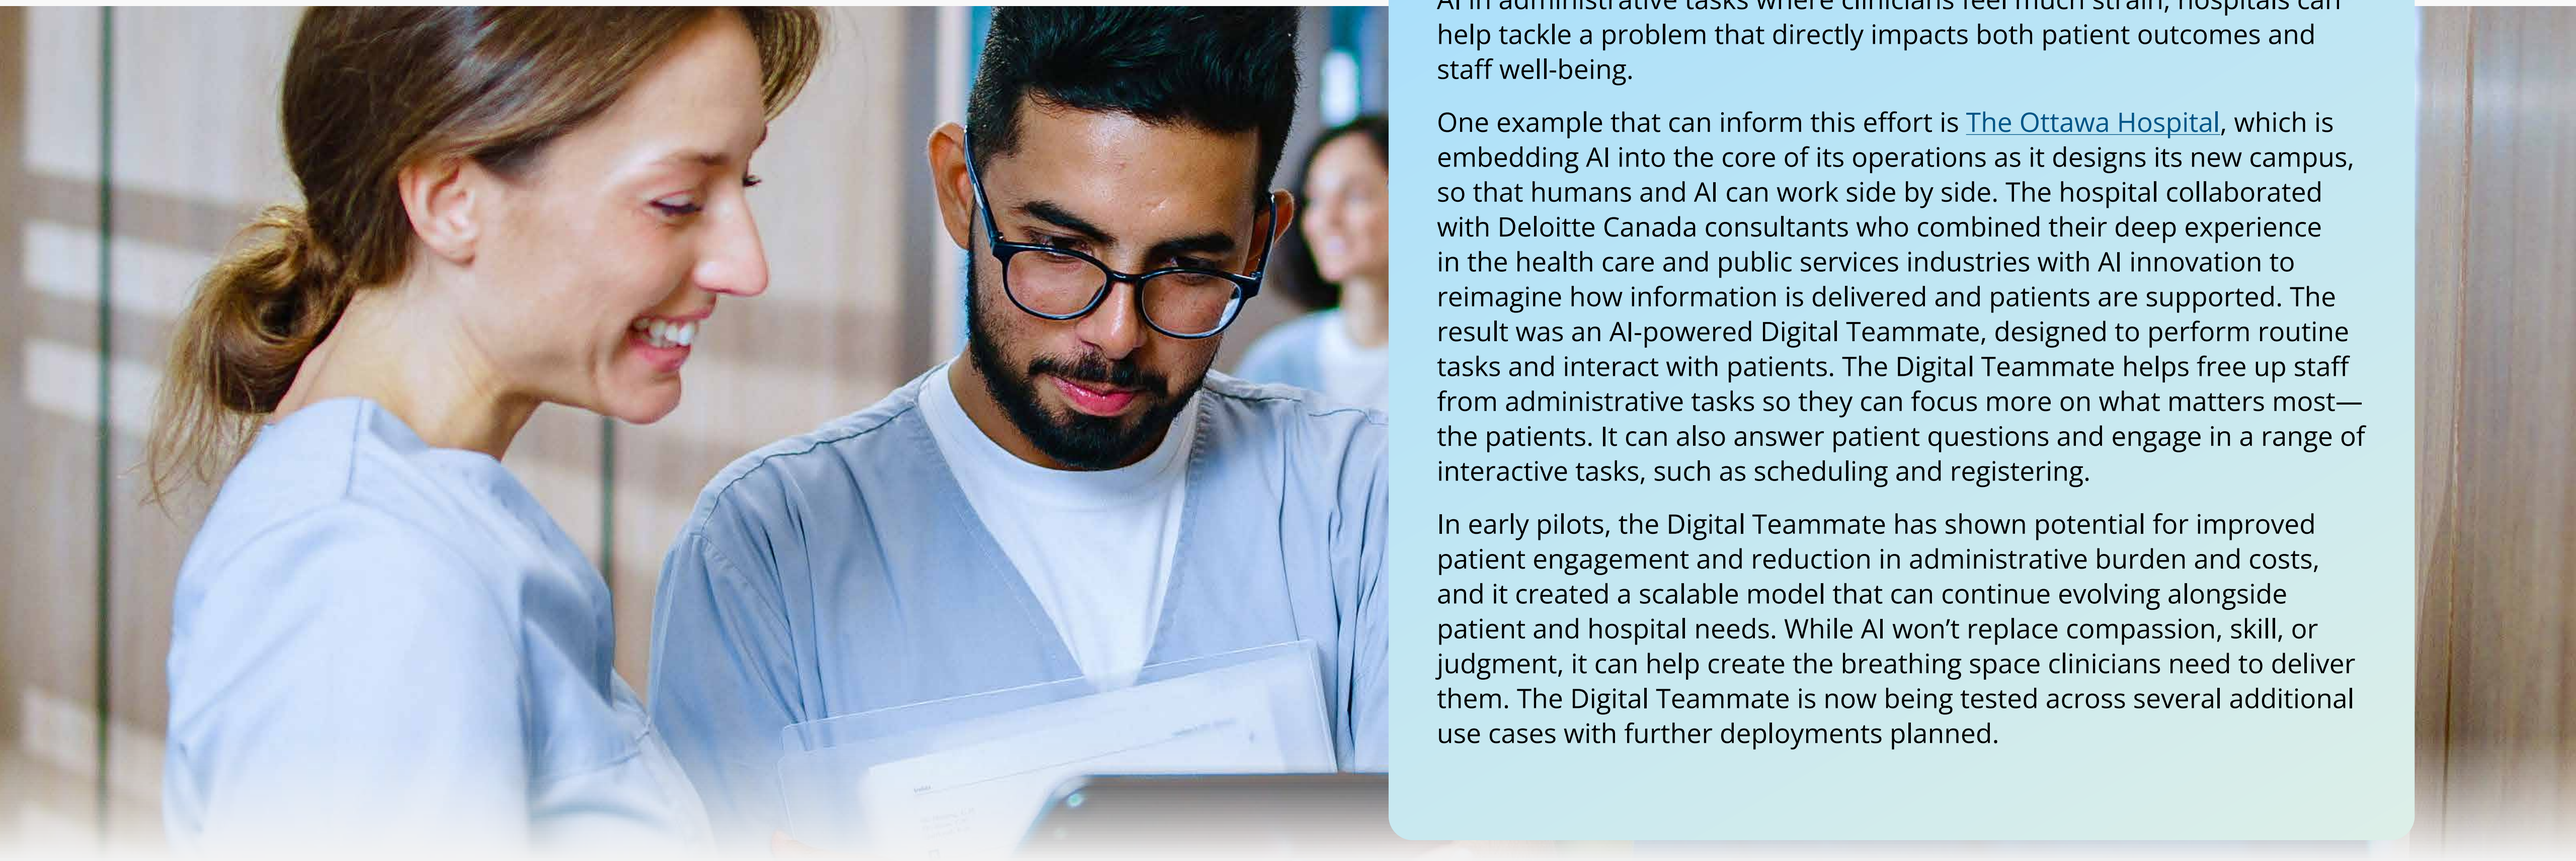

Deloitte is continuing to expand its Agentic AI capabilities in collaboration with its ecosystem of alliances and technology relationships. This includes Zora AI™ by Deloitte, our global agentic AI platform engineered by NVIDIA that deploys a digital workforce within client environments to help organizations simplify operations, enhance productivity, and unlock value through intelligent decision-making. Our human-centered Agentic AI solutions combine Deloitte's deep industry and functional experience and trusted technology architecture to help clients create measurable value at scale.

The surge in AI adoption is also driving unprecedented demand for robust, enterprise-grade infrastructure. In response, Deloitte is helping clients accelerate and manage their AI journeys through Silicon2Service, including expanding AI Factory-as-a-Service capabilities, developed with ecosystem alliances to rapidly prototype, deploy, and scale secure solutions. In addition, Deloitte's global AI Infrastructure Center of Excellence, helps clients move from concept to production with greater speed, resilience, and control.

Deloitte is also extending its capabilities into the Physical AI space with Robotics2Service—bridging digital and real-world environments through simulation, computer vision, and robotics. This includes an expanded collaboration to develop next-generation solutions powered by NVIDIA Omniverse, helping enable clients to simulate

complex physical environments, optimize operations, and deploy intelligent physical systems with greater confidence. In addition, we are scaling a global network of Physical AI Centers of Excellence to help accelerate adoption.

Our market momentum is further reinforced by continued industry recognition. Deloitte was honored as the NVIDIA NPN Global Consulting Partner of the Year 2026 and received six Google Cloud Partner of the Year awards.

Redefining the patient experience at The Ottawa Hospital

In 2030, it's predicted that there will be a shortage of nearly 400,000 doctors and 2.5 million nurses across Organisation for Economic Co-operation and Development countries. This shortage is contributing to overwhelming workloads among health care workers. But by deploying AI in administrative tasks where clinicians feel much strain, hospitals can help tackle a problem that directly impacts both patient outcomes and staff well-being.

One example that can inform this effort is The Ottawa Hospital, which is embedding AI into the core of its operations as it designs its new campus, so that humans and AI can work side by side. The hospital collaborated with Deloitte Canada consultants who combined their deep experience in the health care and public services industries with AI innovation to reimagine how information is delivered and patients are supported. The result was an AI-powered Digital Teammate, designed to perform routine tasks and interact with patients. The Digital Teammate helps free up staff from administrative tasks so they can focus more on what matters most—the patients. It can also answer patient questions and engage in a range of interactive tasks, such as scheduling and registering.

In early pilots, the Digital Teammate has shown potential for improved patient engagement and reduction in administrative burden and costs, and it created a scalable model that can continue evolving alongside patient and hospital needs. While AI won't replace compassion, skill, or judgment, it can help create the breathing space clinicians need to deliver them. The Digital Teammate is now being tested across several additional use cases with further deployments planned.

Orchestrating operations for enduring impact

While organizations look to accelerate growth and innovation, new disruptive technologies, a scarcity of sought-after skills, and an evolving legal and regulatory landscape can make it challenging to keep up and respond to the pace of change that's reshaping business today. In this dynamic environment, operating with greater resilience, reliability, and adaptability is an essential pillar of business stability and progress.

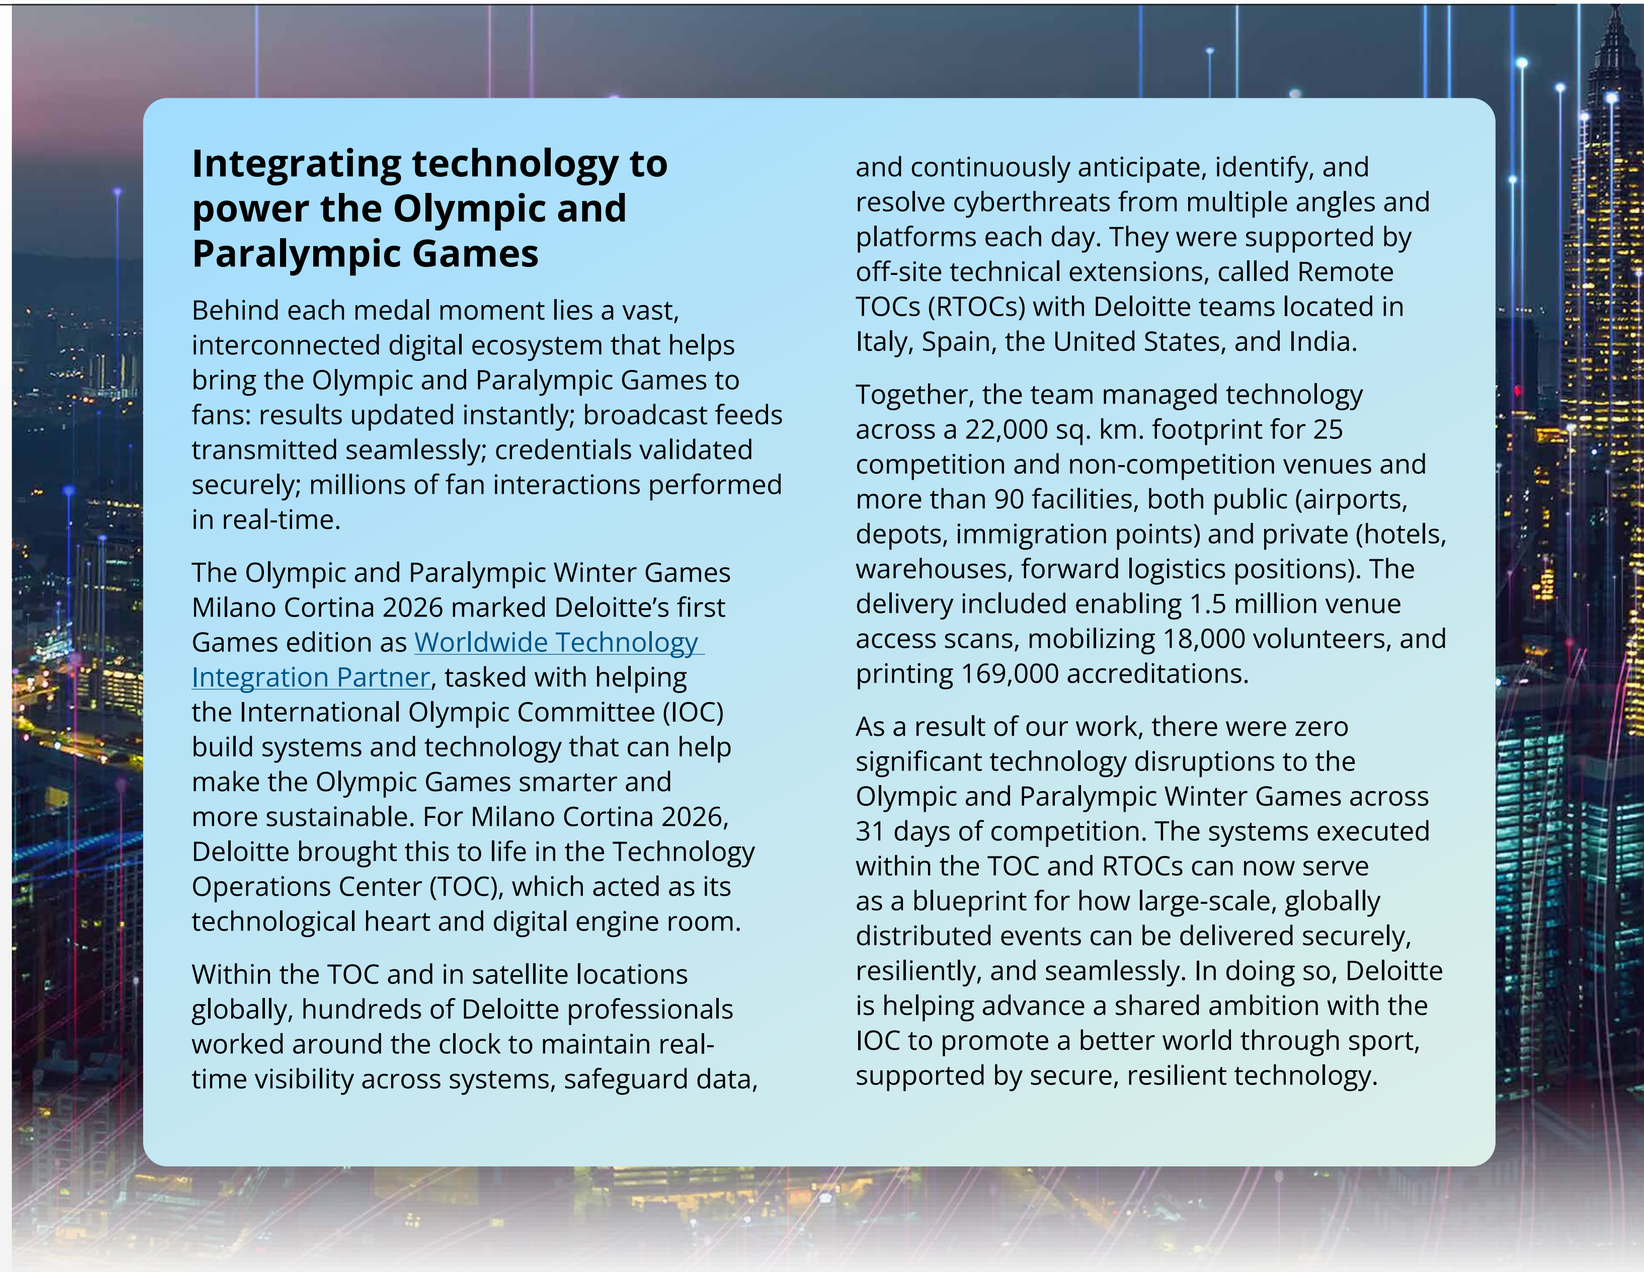

Through Deloitte's Operate services, we embed continuous advantage into business operations by delivering next-generation services that orchestrate AI and help organizations function intelligently, with greater agility and control.

This past year saw significant growth and innovation within Operate, including the launch of new cross-business solutions and offerings. For example, the Cyber Attack Surface Management service helps clients assess and strengthen their tech environments to protect and enhance organizational resilience, helping to safeguard critical infrastructure and bolster trust in an increasingly digital world. Similarly, the Future of Airlines solution, which leverages SAP and Oracle platforms for scalable airline operations transformation and modernization, contributes to a more reliable and efficient global transport network, connecting people and economies.

Deloitte has again been named as a Leader in the 2026 Gartner® Magic Quadrant™ for Finance & Accounting Business Process Outsourcing[1].

Creating long-term sustainable value at the heart of the organization

Sustainability embedded in business practices can be a competitive differentiator, helping organizations create value, lower costs, find efficiencies, and build long-term resilience. From navigating day-to-day matters to long-term transformation, Deloitte Sustainability works with organizations to help turn their ambition into results today, while

Integrating technology to power the Olympic and Paralympic Games

Behind each medal moment lies a vast, interconnected digital ecosystem that helps bring the Olympic and Paralympic Games to fans: results updated instantly; broadcast feeds transmitted seamlessly; credentials validated securely; millions of fan interactions performed in real-time.

The Olympic and Paralympic Winter Games Milano Cortina 2026 marked Deloitte's first Games edition as Worldwide Technology Integration Partner, tasked with helping the International Olympic Committee (IOC) build systems and technology that can help make the Olympic Games smarter and more sustainable. For Milano Cortina 2026, Deloitte brought this to life in the Technology Operations Center (TOC), which acted as its technological heart and digital engine room.

Within the TOC and in satellite locations globally, hundreds of Deloitte professionals worked around the clock to maintain real-time visibility across systems, safeguard data, and continuously anticipate, identify, and resolve cyberthreats from multiple angles and platforms each day. They were supported by off-site technical extensions, called Remote TOCs (RTOCs) with Deloitte teams located in Italy, Spain, the United States, and India.

Together, the team managed technology across a 22,000 sq. km. footprint for 25 competition and non-competition venues and more than 90 facilities, both public (airports, depots, immigration points) and private (hotels, warehouses, forward logistics positions). The delivery included enabling 1.5 million venue access scans, mobilizing 18,000 volunteers, and printing 169,000 accreditations.

As a result of our work, there were zero significant technology disruptions to the Olympic and Paralympic Winter Games across 31 days of competition. The systems executed within the TOC and RTOCs can now serve as a blueprint for how large-scale, globally distributed events can be delivered securely, resiliently, and seamlessly. In doing so, Deloitte is helping advance a shared ambition with the IOC to promote a better world through sport, supported by secure, resilient technology.

preparing for what comes next. By combining cutting-edge technologies with deep industry capabilities, Deloitte's end-to-end solutions and services act as an engine for value creation, a competitive differentiator, and a driver of innovation.

Deloitte works to help clients move toward energy strategies that balance security, reliability, and affordability. To that end, Deloitte supports the World Economic Forum's First Suppliers Hub, which is the First Movers Coalition's global repository that connects suppliers of low-carbon products and services with buyers to help scale high-ambition technologies in hard-to-abate sectors. Deloitte teams also work alongside organizations to help them increase transparency and embed circularity to strengthen supply chains amid market uncertainty.

Deloitte teams are also helping clients build more sustainable, resilient, and intelligent infrastructure around the world. A June 2025 Deloitte report found that natural disasters alone are projected to cause approximately US$460 billion in average annual losses to infrastructure globally by 2050. Enhancing infrastructure resilience with AI could help prevent 15% of these losses, translating to approximately US$70 billion in annual savings.

Through Infrastructure Insights Pro, in collaboration with Google, Deloitte is able to combine AI, advanced analytics, and geospatial data with industry insights to turn complex data into reliable information for everyday business decisions. Solutions powered by Infrastructure Insights Pro support clients to make faster, more cost-effective decisions around transport planning, sustainable land-use choices, and the permitting process, and enables them to move from reactive responses to proactive, long-term planning.

Deloitte has been named a leader in the 2026 Verdantix Green Quadrant for Sustainability Consulting Services in recognition of our market-leading capabilities in sustainability corporate strategy and innovation.

Driving smarter transit with Delhi Metro Rail Corporation

Delhi Metro Rail Corporation (DMRC) serves around seven million commuters each day across 303 stations in India's capital region. As the network continued to grow, DMRC faced the challenge of managing large volumes of operational data spread across disconnected systems. Fragmented data silos and manual monitoring processes made it difficult to gain a real-time view of network performance, identify emerging concerns, and proactively maintain critical infrastructure.

To address these challenges, DMRC collaborated with a team of Deloitte South Asia consulting practitioners and Google Cloud to create a cloud-based data center of excellence. Together, the teams developed a unified platform that consolidates data from across the metro network, providing real-time operational visibility and AI-powered predictive maintenance capabilities. By identifying early fault patterns before they become larger concerns, the solution helps to enable a more proactive, efficient, and scalable approach to network management.

As a result, DMRC has strengthened the safety, reliability, and efficiency of one of Asia's largest metro systems. The new platform is projected to deliver a 15% improvement in time savings for maintenance planning and a 10-20% reduction in downtime, helping improve service continuity for millions of daily passengers. The solution also supports DMRC's sustainability goals by identifying energy efficiency opportunities, extending the useful life of equipment through predictive maintenance, and encouraging greater use of public transportation through a more reliable commuter experience.

Underpinned by a modular cloud architecture, the digital foundation is designed to scale alongside DMRC's future growth, demonstrating how a digital-first approach can redefine what is possible in public transportation.

Bringing integrity and trust to capital markets

Businesses across industries are facing important reporting changes driven by updated financial accounting standards, a complex global economic environment, widely varied regulatory requirements, and evolving societal expectations. As a leader in quality, Deloitte Audit & Assurance (A&A) remains committed to our vital role in maintaining trust across capital markets and the corporate reporting ecosystem and to upholding integrity, independence, and transparency.

Deloitte A&A practitioners combine professional judgment and critical thinking with advanced technology through Deloitte Omnia to strengthen trust and support consistent, high-quality delivery at global scale. Deloitte recently launched a new unified agentic intelligence network within Omnia that brings AI capabilities together to help Deloitte practitioners analyze information, identify potential risk factors, prepare preliminary documentation, and highlight considerations for engagement teams' review. This includes Deloitte's Research Assistant, an AI-enabled research capability that has processed over 2.56 million successful chat requests, helping professionals access relevant technical guidance more effectively as they navigate complex accounting, auditing, and reporting questions. Deloitte Omnia's Agentic AI capabilities were named the 2026 Digital Innovation of the Year by the International Accounting Forum and Awards.

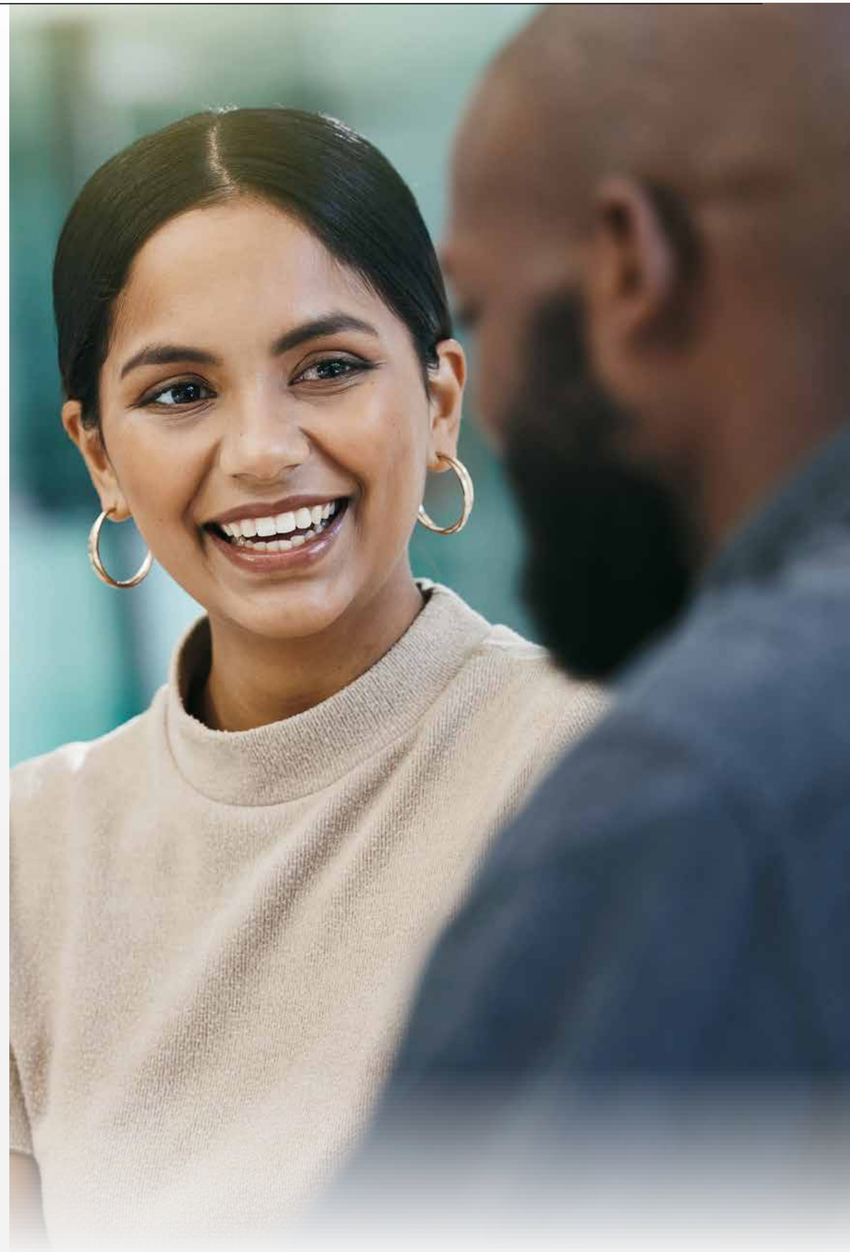

Deloitte's commitment to quality and transparency extends to the work A&A practitioners do to strengthen finance ecosystems and build the foundations that make credible, reliable reporting possible. This is evident in Deloitte's assurance advisory work, as part of a cross-business team, with a global banking client to modernize and simplify its enterprise finance platform using SAP and SAP Fioneer technologies. By harmonizing the general ledger, integrating subledgers, strengthening data governance, and embedding AI capabilities, Deloitte helped the client move from fragmented systems and manual processes to a more connected, controlled, and transparent finance environment—supporting a faster close, improving the quality of management insights, and enhancing the client's ability to respond to evolving reporting and regulatory requirements.

Responding to a dynamic tax and legal landscape

As global external forces fundamentally shift the tax and legal environment, Deloitte Tax & Legal (T&L) helps organizations anticipate and respond to rising compliance complexity, policy and regulatory change, digitalization of tax, and the impact of advanced technology and AI.

We continue to help organizations rethink and transform their tax and legal departments, driving the growth of Operate and Tax Transformation Consulting services, including implementation and outsourcing supported by Intela, Deloitte's tax management platform. The deployment of the Intela Digital Assistant (IDA), an AI-powered digital teammate, has enhanced productivity by supporting everyday tasks, providing real-time guidance, and helping to enable intuitive interaction with data and workflows.

Together with Deloitte Operate, Deloitte T&L launched Deloitte E-invoicing powered by Thomson Reuters ONESOURCE Pagero. In a world seeing rapid adoption of e-invoicing and e-reporting mandates for indirect taxes, it offers an innovative, flexible operating model that helps streamline compliance, enhances data-driven insights, and equips businesses to navigate regulatory changes with confidence.

Deloitte's legal business continued to advance technology-enabled legal service delivery through the integration of AI-powered capabilities across legal workflows. By combining legal, tax, risk, and technology experience with leading legal AI platforms such as Legora, Deloitte is helping organizations modernize legal operations, streamline complex work, and enhance decision-making across legal, tax, compliance, and risk functions.

Deloitte Tax secured multiple wins at the *International Tax Review 2025 Regional Tax Awards* across EMEA, Asia Pacific, and the Americas.

Delivering enduring value amid continuous change

Deloitte's consulting services—Strategy, Risk & Transactions (SR&T) and Technology & Transformation (T&T)—help organizations identify, assess, and solve challenges at the heart of their business. Today's complex questions require multidimensional answers sourced from the broadest range of knowledge and global capabilities. Through our global reach, we bring together industry and sector fluency, functional specialization, and leading-edge technology alongside ecosystems, alliances, and technology relationships to orchestrate optimal outcomes for Deloitte clients and business partners.

SR&T is Deloitte's comprehensive strategic advisory business, helping clients address important business decisions. We support organizations through defining moments, from pursuing growth and investment opportunities to navigating transactions, transformation, risk, and sustainability challenges. Working alongside executive teams, boards, and investors, we help clients create and protect value, manage risk, navigate significant M&A transactions, and position their organizations for long-term success.

Deloitte T&T professionals connect strategy to execution across large-scale transformations. Our capabilities, people, and platforms—accelerated by AI—help clients realize value from their end-to-end technology-driven transformations. T&T offerings address clients' core business issues across growth, operations, efficiency, cybersecurity, customer experience, and more.

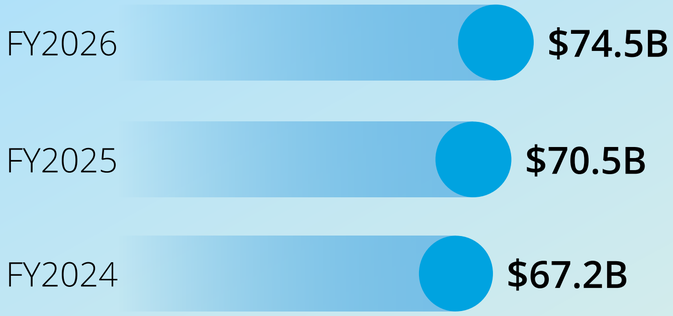

Recognizing industry and sector specialization as a differentiator for clients, Deloitte has expanded its IndustryAdvantage™ suite of sector-specific, technology-enabled solutions in domains such as health, operations, and insurance. We also continue to scale Deloitte Ascend™, our state-of-the-art delivery platform, to drive clients' business transformations through consistent, high-quality outcomes on a global scale.

Over the past year, Deloitte expanded its longstanding partnership with McLaren Racing, becoming an Official Transformation Partner across McLaren's global portfolio, supporting the team in Formula 1, Arrow McLaren in the NTT INDYCAR SERIES, and McLaren's upcoming entry into the FIA World Endurance Championship in 2027. This collaboration helps McLaren Racing drive transformation: implementing digital twin simulation, supporting finance operations, circularity measurement, and more.

Deloitte was again ranked No.1 consulting service provider in the Gartner Market Share Analysis: Consulting Services, Worldwide, 2025 report[2].

People

People

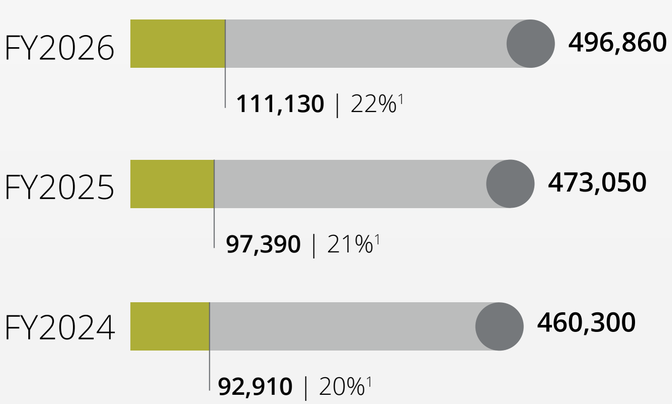

Deloitte is helping lead the way into a people-led, AI-powered future. In a world of rapidly advancing technology innovation, the skills and qualities that are uniquely human—including judgment, leadership, empathy, and curiosity—are essential.

Our approach focuses on designing talent experiences that aim to attract, engage, and help empower the diverse workforce required to serve the evolving needs of Deloitte clients and society.

We are committed to fostering an inclusive, supportive workplace where our people can thrive, do meaningful work, and make a collective impact. They are key to our differentiation, and we are dedicated to developing and creating enduring career value for Deloitte people across our global network. Our approach to our workplace is guided by our Global Purpose and Shared Values, which underpin our distinctive Deloitte culture, as well as our research on what creates a world-class talent experience. We continue to protect and evolve our culture to bring to life our deep commitment to trust, quality, and integrity, as well as keeping our people at the core of the AI transformation.

Total headcount and new hires

496,860 total people in FY2026

Notes: Figures are aggregated across the Deloitte network.

Empowering lifelong learners

Deloitte is focused on providing world-class learning and development (L&D) experiences to equip our people to meet Deloitte clients' needs today—and to help build the workforce of the future. We leverage innovative, immersive L&D experiences to deepen human capabilities, growing curiosity and agility, and accelerating early-hire readiness.

Our technology-based skill development focuses on GenAI, Agentic AI, cloud, cybersecurity, and sustainability, to name a few, with training grounded in the responsible use of AI. Through technical certifications, hack-a-thons, and leading-edge academies, we are significantly investing in the capabilities required for emerging skillsets (e.g., Forward Deployed Engineers). As part of our commitment to continuing to innovate, we have enabled a robust ecosystem of AI tools across Deloitte's global network to drive productivity transformation, engineering acceleration, and enterprise automation, and have offered Deloitte professionals the ability to participate in AI upskilling.

At the same time, through the Enduring Human Capabilities curriculum we seek to strengthen the core capabilities that power our ability to evolve and transform both Deloitte and our people. During the past year, we refreshed the global Deloitte Leader Framework, clarifying and modernizing the leadership capabilities and personal attributes we consider the building blocks of successful leaders in today's complex environment.

Coming together for the moments that matter

Deloitte University (DU) is the cornerstone of our commitment to leadership development. DU offers an immersive environment designed to provide transformational L&D experiences for Deloitte people throughout their careers, including leadership development, career milestones, and signature learning programs. In addition, DU experiences give our people the opportunity to create and strengthen the connections that are so important to making an impact in a global network serving multinational clients. DU also welcomes Deloitte clients for customized experiences. During the past year, more than 244,000 people participated in programs at DU.

From the opening of the first DU in Westlake, Texas in 2011, DU has shown us the importance of being together for the moments that matter. Since then, we have launched additional facilities in Hyderabad, Mexico City, Singapore, Toronto, Paris, and Beijing. In 2026, we completed a significant expansion of our original Westlake facility, adding approximately 600,000 square feet of campus, including learning, collaboration, and innovation spaces for Deloitte people and clients.

Deepening market-relevant capabilities

This year, we continued to bring together our people from around the world to learn about topics important to Deloitte clients. We held Deloitte's third annual Global AI Week, designed to help deepen our people's AI knowledge and enable them to apply AI with confidence in their work. It also focused on the application of Deloitte's ethical technology guiding principles to help guide our people's choices, prompting them to consider both the ethical implications of their technology-related activities and how their actions could affect end users and society. In parallel, the Deloitte AI Institute™ hosted the first Global AI Fest for Deloitte clients and our broader ecosystem. Together, these programs featured more than 50 in-person and virtual learning events coordinated across our global network, encompassing bite-sized "lightning AI talks," hands-on demos of practical AI applications, and insightful conversations that spanned industries and time zones.

To mark Earth Month, we shared client stories, training, and leadership perspectives with a focus on sustainable and resilient supply chains, infrastructure, the energy transition, and non-financial disclosures. As part of a network-wide town hall, Deloitte Sustainability leaders showcased how Deloitte firms are helping clients advance their efforts to embed sustainability at the heart of the business.

How Gen Zs and millennials are redefining progress on their own terms

At Deloitte, investing in and developing our people is one of our top priorities. This year marked the 15th anniversary of the annual Deloitte Global Gen Z and Millennial Survey, which examines how Gen Zs and millennials think about work, life, and leadership. Drawing on responses from more than 22,500 Gen Zs and millennials outside our organization across 44 countries, the research helps organizations—including Deloitte—better understand and support these generations at work.

This year's findings suggest that many Gen Zs and millennials are reshaping the rules of work, redefining ambition, accelerating AI adoption, and elevating purpose, well-being, and connection as core expectations. Their ambition is tempered by a demand for manageable workloads, clear support, and achievable routes to success. Many are focused on long-term fit, seeking roles that align with their values and offer sustainable growth. They are also integrating AI into work and their personal life, including using it to advance efficiency and work quality, and identify learning and development opportunities. One thing remains clear: purpose and a sense of belonging are important factors identified by many respondents. Together, these shifts point to a broader redefinition of progress in today's workforce—one in which many Gen Zs and millennials are choosing balance and purpose over traditional markers of success.

These insights generate great interest in the marketplace, including with Deloitte's clients across industries and geographies. In addition, Deloitte is using these insights to help inform how we better serve our people through achievable career paths, strong learning and development opportunities, and our commitment to a people-led, AI-powered future. By continuing to evolve with our people's needs, Deloitte is well positioned to help them grow with purpose, connection, skill, and balance.

Society

Society

In this time of extraordinary change, technology is reshaping industries and societies at unprecedented speed. The important question is how to make technology more widely accessible and unlock its potential to shape a better future for individuals, communities, and society.

Through Deloitte's Societal Innovation strategy, we are helping to equip people with the technology to create pathways to progress—helping empower talent to transform potential into future-ready skills, providing the social sector with the capabilities to better reach communities, and convening ecosystems to scale solutions that benefit society. Across these three pathways, we are advancing Deloitte's worldwide commitment to invest more than US$3 billion in societal impact initiatives over 10 years (FY2023-FY2032).

In addition, Deloitte firms continue to make an impact that matters through a wide range of pro bono work, volunteering, and charitable donations. Our Deloitte Foundations across our network act as focal points for our community activities, reinforcing and reflecting local societal impact priorities. This includes critical areas such as developing the talent of the future through education and leadership development, as well as working closely with local non-profits and community organizations to amplify their impact and reach.

Empowering talent to transform potential into future-ready skills

Through Deloitte's investments and initiatives focused on creating skills-building opportunities, we are helping the future workforce to adapt and thrive in a technology-enabled economy.

Deloitte Southeast Asia is collaborating with SkillUp, an online learning and employment platform, to help empower learners with in-demand capabilities across high-growth areas such as AI, digital careers, and essential soft skills, combined with access to internships, employer networks, and career opportunities. As part of its AI education strategy, Deloitte US joined the White House Pledge to America's Youth: Investing in AI Education, and is investing in grants, pro bono support, and collaboration opportunities to advance AI upskilling for students, teachers, and workers.

Hours of volunteer and pro bono time

Equipping the social sector to better reach communities

Deloitte is supporting nonprofits in their adoption of AI and digital tools to help accelerate their impact. As Deloitte's technology alliances advance their support through funding and infrastructure investments, Deloitte practitioners serve as the strategic connector between the technology and the nonprofits to help provide solutions that are usable, impactful, and scalable. By building digital readiness across the ecosystem, we can help enable the benefits of technology to reach communities that need them.

Deloitte Belgium developed the AI for Good Toolkit to help empower non-governmental organizations with AI knowledge. The toolkit helps make AI more accessible and relevant for nonprofits through use cases, concrete tools, and clear guidance they can apply in their day-to-day work. Deloitte Africa helped train staff from over 1,200 non-governmental organizations across five countries—including Ghana, Kenya, Nigeria, South Africa, and Zambia—equipping them with the skills to expand their reach, improve operational efficiency, and drive long-term community impact.

Convening ecosystems to scale solutions that benefit society

While AI is poised to drive significant positive impact across society, the supportive ecosystem for "AI for social good"—including mentoring, cloud infrastructure, financial support, skilled talent, and networks for collaboration—remains underdeveloped. Deloitte is helping to ensure that societal innovation and ethical technology solutions can thrive and scale by bringing together experience and networks to build ecosystems.

Deloitte US and Deloitte Africa are collaborating with Amazon Web Services (AWS) on the Social Entrepreneur Accelerator, which helps purpose-driven entrepreneurs with the tools, expertise, and resources to innovate and scale, blending Deloitte's capabilities in digital transformation, strategy, and growth alongside AWS cloud and AI technology. Deloitte and AWS aim to support more than 500 entrepreneurs globally.

In addition, we continue to seek out and support young leaders developing tech-driven social solutions. For example, Deloitte Australia partnered with LiteHaus International, a nonprofit facilitating digital learning opportunities for children across Asia Pacific, to donate computers and establish digital technology labs in schools in Cambodia, Fiji, Kiribati, Papua New Guinea, the Solomon Islands, and Timor-Leste.

Advancing cities' resilience and sustainability to help transform urban life

As rapid urbanization continues, there is a growing imperative for cities to expand in ways that champion resilience, sustainability, and innovation. Because urban areas generate most of the world's economic output, they are central to solving global challenges, from developing more sustainable infrastructure to scaling new technologies. To help meet these urgent needs, the World Economic Forum, in collaboration with Deloitte, Salesforce, and other organizations, launched Yes/Cities, an initiative designed to catalyze local innovation ecosystems and unlock economic opportunities.

Yes/Cities connects governments, innovators, investors, corporates, and community stakeholders around a shared goal: identifying and scaling practical solutions to pressing urban challenges. Through localized innovation challenges and workshops, this global initiative helps to accelerate entrepreneurs through mentorship, technical support, access to capital, and cross-sector collaboration. By helping promising ideas achieve measurable scale, Yes/Cities works to advance sustainable technology, strengthen local economies, foster job creation, and build adaptable, resilient models that cities can adapt and scale.

Building on its successful Yes/San Francisco pilot, over the past year Yes/Cities has expanded to Bengaluru, Boston, and Delhi. And this is just the beginning: by 2030, Yes/Cities aims to engage more than 1,000 entrepreneurs across more than 50 cities, accelerating breakthrough solutions and helping to strengthen innovation ecosystems around the world.

Governance

Governance

At Deloitte, strong and consistent governance—encompassing oversight, challenge, and support—is fundamental to our distinctive Deloitte culture.

We are guided by Deloitte's Global Principles of Business Conduct, which outline the commitments that each of us makes based on our core belief that at Deloitte, ethics and integrity are fundamental.

Deloitte is made up of firms that are members of Deloitte Touche Tohmatsu Limited (also referred to as "Deloitte Global") and each of their related entities in more than 150 countries and territories. Deloitte has separate governance and management structures in place at the Deloitte Global, member firm, and local levels. Deloitte Global supports and enables Deloitte firms across our network.

The Deloitte Global Board of Directors

The Deloitte Global Board of Directors (Global Board) oversees the organization's strategic vision and aspiration, helping ensure that Deloitte serves our clients and communities, upholds ethical standards, and builds trust. Over the past year, the Global Board has focused on oversight of the global strategy, including alignment of investments and progress against key objectives, and on the implications of rapidly developing technologies such as AI for how Deloitte operates and delivers its services.

The Global Board focuses on the long-term growth and resilience of the organization, including emerging opportunities and risks, and provides constructive challenge to management. It governs Deloitte Global's most important strategic matters—including approval of the global strategy, annual budget and investment plan, major policies and transactions, and the selection of the Deloitte Global CEO and Deloitte Global Chair—and oversees management. The Global Board is composed of 18 members drawn from across the Deloitte network, reflecting Deloitte's broad geographic footprint.

Each Global Board member brings skills and experience in core business competencies—including ethics, risk, financial management, people, sustainability, technology, and transformation—to help ensure that the Global Board is equipped to provide robust and strategic oversight of complex matters affecting Deloitte and the markets in which Deloitte operates in both the short and long term. The Global Board has several committees to support its oversight of certain focus areas; engagement across the committees helps ensure they provide well-rounded perspectives and recommendations. In addition, the Global Board regularly reviews the committee structure to help ensure alignment with strategic priorities and the matters requiring deeper governance attention. In addition, a board effectiveness review is conducted annually.

The Global Board Chair and Deputy Chair draw on the experience and external perspectives of the Global Independent Non-Executive Advisory Council—a body comprised of five independent non-executive directors from other Deloitte firm boards—to inform their approach to leading practices. Ongoing engagement with the Deloitte Community of Chairs, which represents the chairs of nearly every geography in which Deloitte operates, strengthens dialogue and coordination on governance matters across our network. In addition, the Global Board regularly invites Deloitte clients, academics, and other outside specialists to share their perspectives with its members.

The Deloitte Global Executive Committee

The Deloitte Global Executive Committee (Executive Committee), composed of 20 senior leaders from Deloitte Global and select member firms, is responsible for driving Deloitte Global operations, advancing Deloitte Global strategic business priorities, and monitoring risks and impacts, as well as embedding purpose in all that we do. The Executive Committee also champions initiatives that help Deloitte make an impact that matters for Deloitte clients, our people, and other stakeholders. The Global Board and the Executive Committee work together to help ensure that key strategic topics remain core to the focus of the Executive Committee.

The Deloitte Global Operating Committee

The Deloitte Global Operating Committee (Operating Committee) provides a vital link between strategy and execution that helps Deloitte perform effectively and efficiently. The Deloitte Global Chief Operating Officer leads the Operating Committee. Additional members include Chief Operating Officers of select member firms, Global Business Chief Operating Officers, and Deloitte Shared Service leaders.

Building greater organizational resilience

Business leaders around the world are now navigating a complex, fast-changing environment, with a convergence of factors—including geopolitical tensions, market shifts, and the rapid adoption of AI—leading to greater uncertainty. As boards and C-suite executives work together in new ways to navigate this volatility while continuing to pursue growth, organizational resilience has become very important.

A report from the Deloitte Global Boardroom Program, How board and C-suite collaboration can build organizational resilience, explores the new normal. The report is based on a cross-industry survey of approximately 750 (non-Deloitte) board members and C-suite executives in nearly 60 countries, along with in-depth interviews with over a dozen board chairs, directors, and CEOs from around the world. When asked about this shift in how they operate, 73% of respondents said their boards have stepped up their levels of activity and involvement, particularly around strategic development and scenario planning. In addition, 66% identified open, transparent communication between the board and the C-suite as the top leadership factor impacting their organization's level of resilience.

As business leaders chart their path forward, the survey results point to several action areas for enhancing collaboration, including fostering transparency and candor, aligning board composition with needed skills and experiences, and promoting an environment where board members are fully engaged in board discussions. Ultimately, having greater collaboration between boards and management can help organizations become more agile in the face of uncertainty and better able to capitalize on the opportunities that can arise in times of change.

For nearly two decades, the Deloitte Global Boardroom Program (the Program) has brought together the knowledge and experience of Deloitte firms around the world to help address critical topics for company boards and management. Supplementing local Deloitte firm programs in 65 countries, the Program promotes dialogue between corporations and their boards and management, investors, the accounting profession, academia, and government. The Program also hosts a series of webinar discussions with eminent panelists and publishes research and insights on critical topics on the board agenda.

Environment

Environment

Deloitte is taking action to help enable and scale the transition to a low-carbon future. Deloitte Global published the Deloitte Net-Zero Transition Plan (NZTP) and, through our global network's efforts, Deloitte is advancing meaningful progress toward reducing the impact of our operations.

The Deloitte Climate Risk Report identifies the priority risks and opportunities at the network-wide level that will help guide Deloitte entities' work. We are also facilitating changes beyond our network by providing sustainability services to Deloitte clients and collaborating with suppliers and other organizations to help develop solutions to sustainability challenges.

Deloitte has committed to achieving net-zero greenhouse gas (GHG) emissions across our value chain by FY2040, as measured at the aggregate, network-wide level. The Deloitte network has set a network-wide goal to reduce absolute scope 1, 2, and 3 GHG emissions by 90% by 2040 from 2019 levels, with the final 10% of emissions neutralized through investment in the permanent removal of carbon. Our net-zero journey is central to Deloitte's long-term resilience and value creation. Our NZTP focuses efforts where we are most capable of making contributions, including transforming the environmental impact of our travel, technology, and buildings; embedding net-zero into supplier relationships; and collaborating across our ecosystem to scale systemic solutions.

Reducing the environmental impact of our business

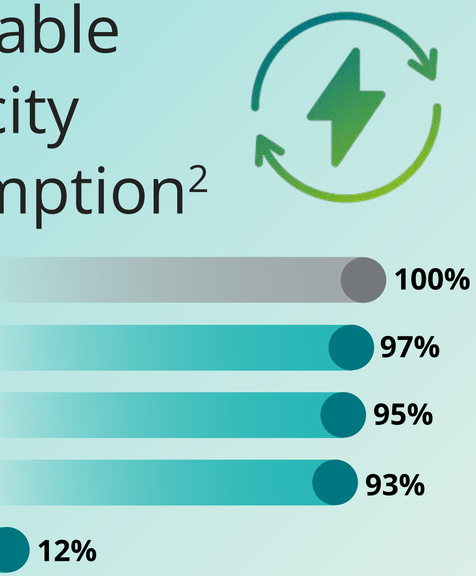

Across our global network, Deloitte firms are implementing actions set out in the NZTP. Recognizing business travel is a significant emissions source, Deloitte NSE[1] developed the Travel Emissions Calculator to provide greater understanding of the environmental impacts of necessary travel—and how thoughtful choices can help reduce them. Across Deloitte's global network, we have reduced scope 3 emissions from business travel per full-time equivalent (FTE) by 61% in FY2026 from FY2019 levels.

While technology is foundational to our work with Deloitte clients, it also accounts for nearly a third of Deloitte's network-wide GHGs. This includes the use of cloud and data centers, laptops and mobile devices, and AI. To help address this, Deloitte is embedding sustainable practices for the technology we develop with our alliances, reducing emissions across the life cycle of technologies used by Deloitte people—from energy-efficient hardware procurement to running software on lower-carbon cloud and data center operations—and helping mitigate the energy demands of GenAI. For example, Deloitte South Asia developed Enterprise Conscious Code, an AI-powered suite that helps optimize enterprise code and compress media files to reduce energy use and emissions. The solution is now being piloted across Deloitte South Asia.

Over the past decade, Deloitte has worked to reduce the environmental impact of our facilities, integrating sustainability considerations across the real estate cycle. For example, the Deloitte University EMEA campus was constructed using renewable and low-carbon materials.

In addition, in FY2026, 97% of the electricity Deloitte purchased network-wide was renewable—and Deloitte continues to explore ways to bring new renewable energy capacity to the grid in pursuit of our 100% renewable electricity goal. For example, Deloitte US secured a long-term contract to buy renewable electricity (or its certificates) that is expected to supply most of its renewable energy needs and reduce electricity-related emissions.

Renewable electricity consumption[2]

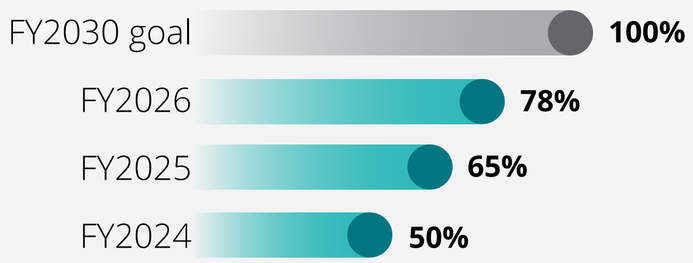

Engaging with our suppliers

Deloitte is also working with suppliers to set net-zero targets for themselves that are aligned with Deloitte's own goals, collaborate on emissions reduction, and advance product-level emissions reporting.

As we continue to increase our understanding of Deloitte's network-wide scope 3 inventory each year, we are working closely with suppliers to improve our actionable baseline and develop potential actions to continue to reduce emissions within our value chain. Many sources of Deloitte's supply chain emissions have high measurement uncertainty, contributing to fluctuations in reported emissions over time. As we pursue Deloitte's network-wide emission reduction targets, we remain focused on increasing the precision with which we measure our emissions, including improving the accuracy of our emissions baseline and current year data toward the goal of improved emissions comparability over time. These efforts are supported by working with Deloitte suppliers to obtain more precise product-level data, as well as evolving our measurement methodologies to align with leading practices.

Electric fleet

Notes: Figures are aggregated across the Deloitte network. Deloitte's vehicle fleet tracking includes plug-in hybrid electric vehicles (PHEVs) and extended range electric vehicles (EREVs) within the electric vehicle (EV) category.

Collaborating across our ecosystem

We continue to help create solutions that can facilitate the transition to a lower-carbon economy. Given our network's use of air travel in serving Deloitte clients, Deloitte prioritizes collaborations to help expand the market infrastructure to reduce emissions from travel and support low-emission transportation solutions.

Deloitte's agreements with World Energy LLC helped enable Deloitte Global and five Deloitte firms to purchase emissions reductions from Sustainable Aviation Fuel (SAF), as part of a multi-year commitment. Deloitte firms continue to make progress in scaling investment in SAF, including Deloitte US through its support of the Minnesota SAF Hub, which is now blending and uplifting SAF in-state.

In addition, Deloitte firms work with their ecosystems to produce actionable insights like Connecting Nature, Climate, and Capital, a collaborative report by Deloitte New Zealand, Bank of New Zealand, and The Nature Conservancy. The report explores how New Zealand can develop high-integrity, nature-based carbon and biodiversity credits and access both domestic and international markets—and highlights the opportunity to unlock private investment into nature restoration and conservation, helping deliver benefits for sustainability, biodiversity, and communities.

Beyond value chain mitigation

Along with reducing Deloitte's emissions, Deloitte entities are investing in solutions that can deliver carbon emission reductions—and help scale early-stage technology and nature-based solutions.

We provide pro bono support and finance (through a combination of direct funding and carbon credits) to a diverse range of external sustainability initiatives that we consider high-impact projects. Depending on Deloitte Global's or each Deloitte firm's specific context and objectives, the investments are funded through Deloitte's voluntary internal carbon price and/or other financing mechanisms. For example, Deloitte DCE[3] contributed to the restoration of ecosystems along the Portuguese coast through its support of SeaForester, which uses innovative techniques to regenerate seaweed forests, a very effective natural CO_2 absorber.

- Net-zero by 2040

Greenhouse gas emissions by scope

Scope 1: Fuel in buildings and fleet

Scope 2: Electricity and district heating and cooling in buildings and fleet

Scope 3: Commuting and teleworking

Scope 3: Business travel

Scope 3: Purchased goods and services

Notes: Emissions figures are presented in metric tonnes CO_2e. Figures are aggregated across the Deloitte network. Due to rounding, sum of sections may not equal total. Commuting and teleworking is reported from FY2024.

Endnotes

Data Highlights

[1] Training hours do not include on the job learning hours that are a core aspect of development at Deloitte.

[2] Total societal investments of US$429M include US$187M in donations, US$199M in value of volunteer and pro bono work, and US$43M in management costs. Figures are aggregated across the Deloitte network. Due to rounding, sum of societal investment by source may not equal total.

[3] The Science Based Targets initiative (SBTi) provides a framework for organizations to develop and validate science-based targets.

[4] Progress toward Deloitte's near-term supplier engagement target is no longer reported because the target period concluded in 2025 prior to reaching the goal. Progress toward absolute long-term scope 3 goal is not currently reported due to changes in calculation methodologies, which limit the comparability of scope 3 emissions reported in more recent years against the baseline data. Deloitte is monitoring changes to relevant reporting frameworks and anticipates updating the network's target-setting and reporting approach in response to such changes, consistent with Deloitte's purpose and strategy.

[5] Percent reduction of metric tonnes of CO_2e in FY2026 vs. FY2019 base year.

[6] Other environmental sustainability goals and initiatives are separate from SBTi science-based targets.

Society

[1] Total societal investments of US$429M include US$187M in donations, US$199M in value of volunteer and pro bono work, and US$43M in management costs. Figures are aggregated across the Deloitte network. Due to rounding, sum of societal investment by source may not equal total.

Environment

[1] Deloitte NSE was sunset on 1 June 2026. All firms in Deloitte NSE are now part of Deloitte EMEA.

[2] Figures are aggregated across the Deloitte network. Where possible, Deloitte entities procure and claim renewable electricity in accordance with the Climate Group's RE100 Technical Criteria and Global Reporting Initiative (GRI) topic standard GRI 302: Energy 2016. In certain markets where procuring renewable electricity is challenging or is not possible, Deloitte entities may procure renewable electricity from a neighboring country. This enables Deloitte to demonstrate commitment to our renewable electricity target and signal market demand. As the renewable electricity procured may not fall within the same RE100-recognized market boundary, there may be variances between renewable electricity amounts reported in the Global Impact Report and within RE100 reports. Deloitte anticipates increasing the alignment with RE100 Technical Criteria over time as market availability of renewable energy increases.

[3] Deloitte DCE was sunset on 1 June 2026. All firms in Deloitte DCE are now part of Deloitte EMEA.

Deloitte.

Together makes progress

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited (DTTL), its global network of member firms, and their related entities (collectively, the "Deloitte organization"). DTTL (also referred to as "Deloitte Global") and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.

Deloitte provides leading professional services to nearly 90% of the Fortune Global 500® and thousands of private companies. Our people deliver measurable and lasting results that help reinforce public trust in capital markets and enable clients to transform and thrive. Building on its 180+-year history, Deloitte spans more than 150 countries and territories. Learn how Deloitte's nearly 500,000 people worldwide work together every day to make an impact that matters at www.deloitte.com.
